

STEALTHWATCH® FLOWSENSOR™ SUPPORTED APPLICATIONS

The StealthWatch FlowSensor¹, an integral part of the StealthWatch System from Lancope®, recognizes more than 900 application variants and their classifications based on a combination of deep packet inspection (DPI) and behavioral analysis — no matter if they are plain text or use advanced encryption and obfuscation techniques.

Supported Applications

The following list includes all supported applications (in bold), sub-applications (in italic), and their variants. The asterisk (*) indicates new applications supported by StealthWatch 6.1.

Custom Application Definition

StealthWatch also supports custom application definitions that allow administrators to specify application patterns based on the following criteria:

- ▶ Layer 4 protocol (i.e., TCP, UDP)
- ▶ Layer 4 ports (lists and ranges)
- ▶ Layer 7 protocol
- ▶ Server IP address or IP address list
- ▶ HTTP host list for HTTP-based Layer 7 protocols
- ▶ SSL certificate information for encrypted traffic

About Lancope, Inc.

Lancope®, Inc. is a leading provider of flow-based monitoring to ensure high-performing and secure networks for global enterprises. Unifying critical network performance and security information for borderless network visibility, Lancope provides actionable insight that reduces the time between problem identification and resolution. Enterprises rely on Lancope to make better network decisions, respond faster to network problem areas and avoid costly outages and downtime — at a fraction of the cost of conventional network monitoring solutions.
